

ICCAD 2026 CAD Contest

The Floorset Challenge (Problem C)

Submission Guidelines

Please submit a single compressed (.tar.gz) folder containing the following:

1. Optimizer executable (PyInstaller recommended for Python submissions)
2. requirements.txt (if the executable does not bundle all dependencies)
3. External files such as model checkpoints, configuration files, and helper scripts
4. Optional README file with any instructions needed to run your code

As a fallback, you may also submit your source code. **No** docker images or files allowed.

System Specifications

Operating System: Debian GNU/Linux 13

Python Environment: Python 3.13.14

PyTorch: 2.12.0+cu130

CUDA: 12.5

GCC: 14.2.0

G++: 14.2.0

GLIBC (ldd): 2.41

Machine Specifications

CPU: Intel Xeon, up to 48 cores, 250 GB RAM (multi-threading allowed)

GPU: NVIDIA A100, 80 GB VRAM

Runtime: No upper limits (runtime measured only during calls to solve() method)

Internet access: No

Evaluation: We will run your optimizer on the hidden test cases during the evaluation in the same command format provided in the evaluation script.
